Executive Lunch

The Executive Lunch of the American Chamber of Commerce is a representative event that brings together presidents and board members of member companies to discuss strategic issues. Speakers at AmCham's Executive Lunches are **selected ministers and senior government officials**, and the business community is attended by leading directors of well-known international and domestic companies. These events are held with the participation of representatives of the public sector and the media at the invitation of AmCham, and usually bring together between 80-120 people with the almost regular participation of the US Ambassador.

March, 2025 Executive Lunch with the US Ambassador

The US ambassador Nathalie Rayes will address AmCham members and present her views on the opportunities for improving business relations between the two countries.

October 7, 2025 Executive Lunch on topic of foreign direct investments

Foreign direct investments are one of AmCham's strategic topics, especially those aimed at export markets, because such investments bring inclusion in global value chains, job creation, transfer of technology, knowledge and work models, which additionally results in the growth of productivity and competitiveness of the economy.

THE SPEECH OF THE MINISTER OF ECONOMY WILL BE FOLLOWED BY A PANEL DISCUSSION.

June 18, 2024

Conference

The main purpose of conference is to present and discuss topics important to business and business standards, as well as inform members and guests of relevant issues and trends. Speakers at AmCham's conferences are **elected ministers and senior representatives of public authorities**, in addition to prominent directors of well-known international and domestic companies from the business community. The speech is followed by a **panel discussion in which representatives of the private and public sectors participate**.

March 25, 2025 Conference "Trends in Healthcare – Challenges and Opportunities"

The focus of the health sector in 2025 will remain on the increasing use of artificial intelligence and advanced technologies, progress in personalized medicine and the application of sustainable principles. A noticeable trend is also the search for solutions for the prevention and treatment of chronic diseases such as obesity. One of the important challenges is finding a balance between increasing the availability of healthcare and access to innovative medicines and limited available budgets/achieving sustainable financing of the healthcare system.

Croatian health care will characterize the completion of infrastructure investments, focus on treatment outcomes, establishment of centers of excellence and strengthening of primary health care with the aim of creating an accessible and sustainable system.

The goal of the event is to discuss how to use new trends and technologies and improve access, quality and efficiency in the provision of health care. It is also important to consider how global challenges will affect the creation of a more agile, patient-centered and data-driven healthcare system.

Conference

May 20, 2025 Conference on the topic of taxes and tax policy

The tax policy in the last decade has significantly contributed to economic growth and stability and increased predictability, which has facilitated business planning. Croatia's credit rating is historically at its best, the gross domestic product is growing steadily and approaching the average level of development of the European Union, i.e. the threshold of 80%.

Despite the increase in wages in the private sector, strong inflation weakened the purchasing power of citizens, while in the public sector the significant increase in wages was not accompanied by an increase in productivity. The lack of adequate and qualified workforce has created difficulties for companies in recent years. Also, the need for increased investments is a consequence of, among other things, the process of green and digital transition.

Does the Government have room for further relief of work and the economy? Are there plans to expand the tax base and sources of taxation in Croatia? Will some of AmCham's recommendations be accepted in the 2026 planning process?

The goal of the event is to exchange opinions and best practices on ways in which tax policy can contribute to strengthening Croatia's competitiveness and creating a favorable and sustainable business environment, economic growth and development.

June 10, 2025 Conference "Digital Croatia 2030"

AmCham strongly supports efforts to raise the level of digitization in Croatia, and therefore the "Digital Croatia 2030" conference is designed as a platform for the exchange of experiences and the latest knowledge on digitization between representatives of public authorities and the business community.

The Conference will discuss the importance of recognizing the topic of digital transformation through raising it to the level of a ministry for the first time in Croatia. The emphasis will be on news and priorities of the new single body responsible for digitization.

This traditional AmCham conference is always an opportunity to discuss new technologies that change business practices and increase business productivity. Technologies like AI are revolutionizing business, but they also bring numerous challenges that need to be recognized.

In parallel with the progress of digital transformation, we are witnessing an increase in the risk of cyberattacks. It is important to make the business community aware of the challenges of the digital economy and discuss how to protect yourself.

November 11, 2025 Conference on the topic of ESG

As the world faces a number of serious challenges - from climate change to social inequalities - the business sector has a responsibility to effect positive change. ESG is a strategy focused on sustainable growth and development that is not only driven by profit generation, but also includes achieving net zero emissions, caring for employees and the community, and transparency in the decision-making process - all elements that make up a successful company that will help people improve their lives in long term.

In 2025, AmCham, in cooperation with the consulting firm Kearney, will award the title of ESG Champion to a company that has excelled in the implementation of ESG goals based on the company's ESG maturity survey. The goal of the conference is to discuss the best ESG practices and inform about regulatory news. While companies focus on achieving environmental goals, goals focused on diversity in the company and the representation of women in management and supervisory boards are not yet widely represented, and among others, these topics will be discussed at the panel discussion of the conference.

AmCham Talents

Contributing to Croatia's future by developing talented, ethical, open-minded business leaders

AmCham Talents program was initiated in 2013 with a goal of developing leadership skills of promising young business professionals.

Young professionals recognized as high potential employees within their companies usually have opportunities for postgraduate education and trainings but lack practical experience and opportunity to develop their soft skills by learning directly from leaders in different industries. This program hopes to bridge this gap and contribute to the personal and career development of such employees through a series of interactive sessions by prominent leaders and networking opportunities with their peers.

So far more than 1150 young talents participated in **AmCham Talents** program and gained valuable knowledge from more than 95 distinguished speakers.

AmCham Gala Dinner

Sponsorship Offer

Every autumn American Chamber of Commerce in Croatia organizes its traditional Gala Dinner for distinguished members and high-ranking officials from government institutions, international organizations and the diplomatic corps (approx. 300-400 invitees).

Part of the proceeds from ticket sales will be donated to charity.

This event provides extremely high visibility and therefore AmCham is offering sponsorship opportunities:
